

SCORE ERP

Smart Enterprise Management Platform

Streamline Operations. Improve Visibility. Scale Efficiently.

ABOUT SCORE ERP

Score ERP is a [comprehensive enterprise ecosystem](#) designed to unify every department into a single, high-performance environment.

Our platform eliminates operational silos, enabling organizations to automate complex workflows and gain [absolute visibility](#) across the entire value chain.

Unified Enterprise Platform

All modules in one system: Finance, Sales, Inventory, HR, and Manufacturing.

Centralized Operations

Eliminate data silos with a single source of truth across all business departments.

Real-Time Visibility

Live dashboards, instant KPIs, and dynamic reporting for data-driven decisions.

Scalable Cloud ERP

Cloud-native infrastructure that grows with your business and multi-company support.

Built for SMEs & Enterprises

Flexible for mid-market needs, yet powerful enough for large-scale operations.

BUSINESS CHALLENGES & SOLUTIONS

⚠ THE CHALLENGES

Manual Spreadsheets

Prone to human errors and data delays

Department Disconnect

Communication breakdowns and data silos

Inventory Mismatch

Results in stockouts or costly overstock

Delayed Reporting

Inability to make timely data-driven decisions

Inefficient Workflows

Paper-based and slow approval processes

✓ SCORE ERP SOLUTIONS

Automated Integration

Unified and accurate data across all functions

Unified Platform

Connecting all departments in real time

Live Inventory Tracking

Batch/Serial management with alerts

Instant Dashboards

Live KPIs and scheduled automated reports

Digital Automation

Streamlined role-based digital approvals

| CORE MODULES OVERVIEW

Integrated solutions for end-to-end business management

Accounting

Financial reporting, AR/AP, and multi-currency ledgers.

Sales

Order management, automated invoicing, and tracking.

CRM

Lead nurturing, pipeline management, and support.

Purchase

RFQ workflows, supplier portals, and cost tracking.

Inventory

Real-time stock tracking and warehouse automation.

Manufacturing

BOM, production planning, and shop floor control.

HR & Payroll

Employee lifecycle and automated payroll processing.

Asset Management

Lifecycle tracking and maintenance scheduling.

Projects

Kanban tasks, timesheets, and profitability analysis.

Website

Integrated e-commerce and customer portals.

Integrations

Seamless API connectivity with third-party apps.

Cloud Sync

Centralized data across all business locations.

| MANUFACTURING & PRODUCTION PLANNING

Precision engineering and shop floor control for peak operational performance

BOM & Work Orders

- Multi-level Bill of Materials with precise scrap and cost tracking.
- Automated Work Order generation from Sales Orders or MTO demands.
- Capacity planning and resource allocation for optimized throughput.

Job Cards & Quality

- Real-time Job Card tracking for labor and machine time monitoring.
- Integrated Quality Inspections at every stage of the factory workflow.
- Automated non-conformance reporting and corrective action triggers.

ENTERPRISE ASSET MANAGEMENT

Full asset lifecycle tracking and maintenance planning

Asset Lifecycle Tracking

End-to-end monitoring from procurement and commissioning to disposal and decommissioning.

Depreciation Schedules

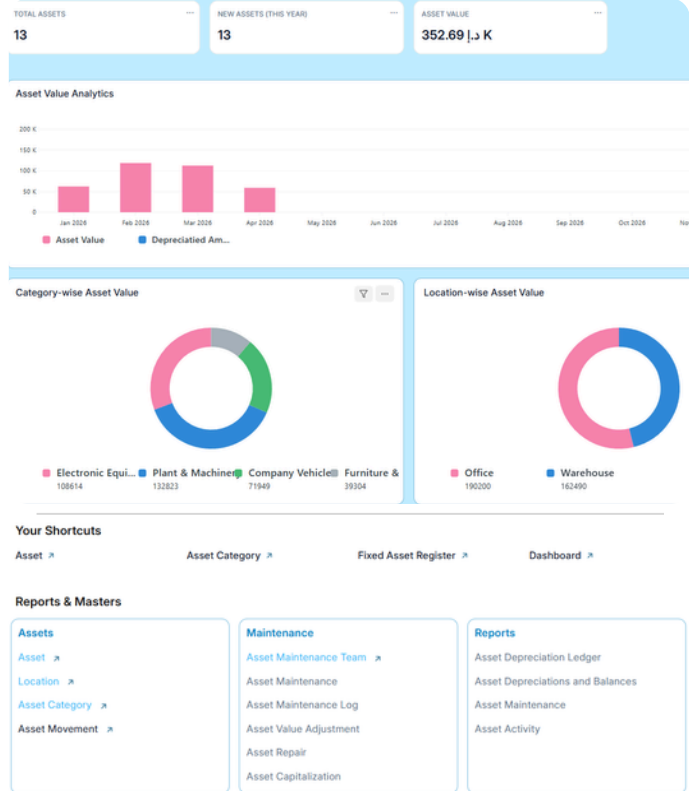

Automated calculation of asset value using multiple methods (Straight Line, Double Declining, etc.).

Maintenance & Reliability

Centralized planning for preventive maintenance, work orders, and equipment service history.

Assets Dashboard & Module

| HR AND PAYROLL AUTOMATION

Comprehensive employee lifecycle and automated compensation management

Workforce Management

- ✓ Centralized employee database with digital profiles.
- ✓ Automated onboarding and offboarding workflows.
- ✓ Secure document management and e-signatures.

Payroll Processing

- ✓ One-click payroll with local tax compliance.
- ✓ Customizable salary structures and bonus rules.
- ✓ Automated payslip generation and direct deposits.

Time & Attendance

- ✓ Real-time biometric and geo-fencing integration.
- ✓ Dynamic shift scheduling and roster management.
- ✓ Automated overtime and late-in calculation.

Performance & Leave

- ✓ Self-service leave requests and approval chains.
- ✓ KPI tracking and periodic performance appraisals.
- ✓ Skill gap analysis and training tracking.

| COLLABORATIVE PROJECT MANAGEMENT

Efficient project collaboration using Kanban boards, task timelines, cost tracking, and integrated reporting.

Visual Workflow (Kanban)

- ✓ Interactive drag-and-drop task management
- ✓ Customizable workflow stages per project
- ✓ Real-time team collaboration and updates

Financial Control

- ✓ Real-time cost tracking and budgeting
- ✓ Project-based expense monitoring
- ✓ Profitability analysis per project

Strategic Planning

- ✓ Dynamic timeline and Gantt charts
- ✓ Milestone tracking and resource allocation
- ✓ Automated dependency management

Performance Analytics

- ✓ Integrated project progress reporting
- ✓ Team productivity and efficiency metrics
- ✓ Automated executive summary dashboards

| WEBSITE & API INTEGRATIONS

Seamless connectivity for a unified enterprise ecosystem

APIs & Webhooks

- ✓ Robust RESTful API for custom third-party extensions.
- ✓ Real-time Webhooks for instant data event triggers.

E-commerce Sync

- ✓ Automatic inventory sync with Shopify and Magento.
- ✓ Centralized order management across all platforms.

App Ecosystem

- ✓ Direct payment gateway and logistics integrations.
- ✓ Native connectors for leading CRM and marketing tools.

Unified Data Flow

- ✓ Bi-directional data flow ensuring a single truth source.
- ✓ Secure cloud-to-cloud synchronization protocols.

| CLOUD INFRASTRUCTURE & DATA SECURITY

Enterprise-grade security and resilient foundation for your data integrity

Infrastructure & Scalability

- ✓ High-availability cloud hosting with 99.9% uptime.
- ✓ Elastic scaling to support growing enterprise workloads.

Role-Based Access Control

- ✓ Granular user permissions and secure authentication.
- ✓ Strict audit trails for all system transactions.

Backups & Data Integrity

- ✓ Automated daily backups with redundant storage.
- ✓ End-to-end encryption for data at rest and in transit.

Modern distributed architecture ensuring maximum resilience.

| KEY STRATEGIC BENEFITS

Empowering your enterprise with high-impact operational advantages

Fast Implementation

Rapid deployment with pre-configured industry templates and a streamlined migration methodology.

Cost-Effective

Maximize ROI by reducing total cost of ownership and eliminating redundant manual workflows.

Customizable

Highly flexible platform that adapts to your unique business logic without complex coding requirements.

Mobile Accessible

Full mobile support ensures critical business data and approvals are accessible anywhere, anytime.

Real-Time Analytics

Live data visualization and integrated dashboards provide instant insights for proactive decision-making.

Scalable Architecture

Future-proof cloud infrastructure designed to grow seamlessly from SME to large-scale enterprise.

| WHY SCORE ERP STANDS OUT

Comparison of Score ERP's flexible workflows, lower operational costs, and user-friendly interface against traditional enterprise systems.

Key Feature	Traditional ERP Systems	Score ERP Platform
 Deployment Speed	 12-24 months complex implementation	 Rapid agile go-live in weeks
 Cost Structure	 High upfront licensing & hidden fees	 Transparent ROI & lower operational costs
 User Experience	 Clunky, dated & steep learning curve	 Modern, intuitive & user-friendly SaaS UI
 Business Agility	 Rigid, siloed & hard to customize	 Highly flexible & integrated workflows
 Performance	 Resource-heavy legacy architecture	 High-speed enterprise-grade scalability

| IMPLEMENTATION ROADMAP & PROCESS

A systematic journey from initial discovery to long-term success

PHASE 01

Discovery & Analysis

In-depth requirement gathering and business process alignment.

PHASE 02

Environment Setup

Infrastructure provisioning and core system configuration.

PHASE 03

Data Migration

Secure cleansing and transition of legacy data to Score ERP.

PHASE 04

Customization

Tailoring modules and workflows to specific operational needs.

PHASE 05

User Training

Comprehensive hands-on workshops for teams and admins.

PHASE 06

Go-Live Launch

Production deployment with final cutover and monitoring.

PHASE 07

Post-Live Support

Ongoing technical assistance and continuous optimization.

| DIVERSE INDUSTRY APPLICATIONS

Showcasing expertise across Manufacturing, Retail, FMCG, Logistics, Healthcare, and Distribution sectors.

Manufacturing

Advanced production planning, multi-level BOM management, and real-time shop floor control.

BOM CONTROL
